Toxoplasmosis - Epidemiology &
Risk Factors - Foodborne illness
(also foodborne disease and
colloquially referred to as food
poisoning) is any illness resulting
from the food spoilage of
contaminated food, pathogenic
bacteria, viruses, or parasites that
contaminate food, as well as
toxins such as poisonous
mushrooms and various species
of beans that have not been boiled
for at least 10 minutes..
Symptoms vary depending on the
cause, and ... Tue, 13 Mar 2018

Diagnosis, Treatment, Prevention
| VetBooks - Helminths (/ Ę^ h Ę
l m Ę^ n Ę, s /), also commonly
known as parasitic worms, are
large multicellular organisms,
which can generally be seen with
the naked eye when they are
mature. They are often referred to
as intestinal worms even though
not all helminths reside in the
intestines. For example,
schistosomes are not intestinal
worms, but rather reside in blood
vessels. Tue, 13 Mar 2018
